

EXPERIMENT 11

AIM:

To develop a real-time student performance dashboard using JavaScript and Chart.js.

TOOLS USED:

- 1 HTML
- 2 CSS
- 3 JavaScript
- 4 Chart.js
- 5 Visual Studio Code

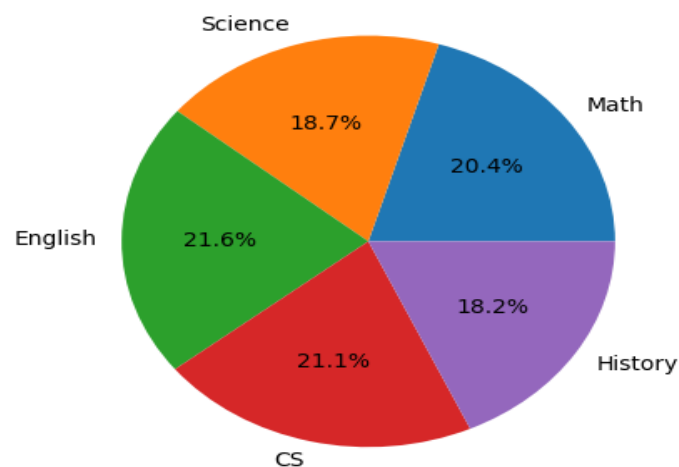

PROCEDURE:

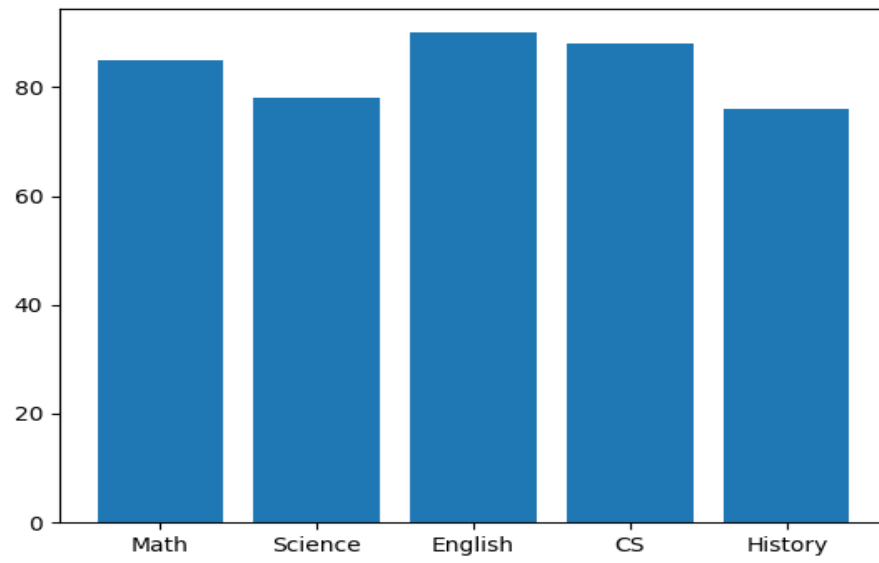

- 1 Step 1: Create HTML structure with canvas elements for charts.
- 2 Step 2: Apply CSS styling for dashboard layout.
- 3 Step 3: Add student marks data using JavaScript.
- 4 Step 4: Create pie and bar charts using Chart.js.
- 5 Step 5: Display charts dynamically.

WORKING:

- 1 System processes subject-wise student marks.
- 2 Pie chart shows percentage distribution.
- 3 Bar chart compares subject performance.
- 4 Charts update dynamically.

OUTPUT:

RESULT:

The experiment was successfully completed. Student performance dashboard was implemented with clear data visualization.
